

EODC specialises in the field of Earth Observation. We operate public cloud computing infrastructure and a multi-petabyte high-speed storage system, connected to Austria's most powerful computer, the VSC-4 (Vienna Scientific Cluster).

The Earth Observation Data Centre (EODC) GmbH is looking for a

IT Operations and Infrastructure Engineer

Full-time

Unlimited Contract

Vienna, Austria

What you'll be doing

Working together in a focussed and dedicated team, you'll be hands on with some of the latest hardware and technology stacks. Your focus will be providing and building infrastructure services for internal users, as well as our on-premise public cloud environment.

- Design and implement new system components to support users, both for within our on-premise public cloud environment and wider services.
- Write and operate automation playbooks and scripts.
- Participate and share knowledge as part of our “no black boxes” team approach.
- Overall system support, including expansion and upkeep of our modern infrastructure.
- Improving automation and availability for existing services.
- Getting hands-on with a range of exciting and cutting-edge technologies.

What you'll offer

- Familiar and comfortable with IaC (*Ansible, Terraform*),
- Good knowledge of containerisation (*Docker, K8s*) and virtualisation (*Openstack, KVM*)
- Understanding of clustering, high-availability, and load balancing concepts.
- Strong Linux know-how, particularly with RHEL and clones. (*CentOS, AlmaLinux, Rocky etc.*)
- Nice to have - CI/CD principles. (*GitLab*)
- Comfortable with a scripting language, (*bash, python, go*).
- Team player with a proactive attitude.

What we like

- Eagerness to understand what makes things work.
- An ability to explain concepts at varying levels of technical understanding.
- Linux, open source-software, command-line interfaces, reproducibility

- Fresh ideas, insights, and solution-oriented response to challenges.
- Independent, responsible, and flexible work organisation.

What we'll offer

- A gross monthly salary from €3,100 (38.5 hours a week) within the IT-KV.
Overpayment possibilities depending on qualifications and experience.
- Generous opportunities for professional development.
- Flexible working hours.
- A modern office with easy public transportation access.
- A role in an established, international, and enthusiastic company.
