

EODC specialises in the field of Earth Observation. We operate public cloud computing infrastructure and a multi-petabyte high-speed storage system, connected to Austria's most powerful computer, the VSC-4 (Vienna Scientific Cluster).

The Earth Observation Data Centre (EODC) GmbH is looking for a

Trainee/Junior Cloud and IT Systems Engineer (f/m/d)

Part-Time/Full-time

Unlimited Contract

Vienna, Austria

What you'll be doing

Working together in a focussed and dedicated team, you'll be hands on with some of the latest hardware and technology stacks. Your focus will be on implementing and designing Cloud and Infrastructure components to support our existing services and users.

- Gaining experience and knowledge on a broad range of subjects.
- Working as part of a team to understand and implement new system components.
- Taking part in knowledge sharing as part of our “no black boxes” team approach.
- Identifying tasks and working towards automation improvements.
- Overall system support and maintenance.
- Participating in customer and user support.
- Improving automation and availability for existing services.
- Working in an international team using English as the working language.
- Getting hands-on with a range of exciting and cutting-edge technologies.

What you'll offer

- A strong desire to learn and excel in a Linux command-line based environment.
- Good analytical and problem-solving skills.
- Willingness to dive-in to new topics and learn independently when required.
- Communication skills, both written and spoken.
- Understanding of virtualisation concepts.
- Familiarity with system design (client-server architecture, clustering, networking)
- Team player with a proactive attitude.

What we like

- Eagerness to understand what makes things work.
- An ability to explain concepts at varying levels of technical understanding.
- Linux, open source-software, command-line interfaces, reproducibility.
- Fresh ideas, insights, and solution-oriented response to challenges.
- Independent, responsible, and flexible work organisation.

What we'll offer

- A gross monthly salary from €2,100 (38.5 hours a week) within the IT-KV.
Overpayment possibilities depending on qualifications and experience.
- Employment possibilities between 25 -38.5 hours.
- Hands-on mentoring and training.
- Generous opportunities for professional development.
- Flexible working hours with home office possibilities.
- A modern office with easy public transportation access and barrier-free access.
- A permanent role in an established, international, and enthusiastic company.
