

EODC Earth Observation Data Centre GmbH

The EODC Earth Observation Data Centre for Water Resources Monitoring GmbH (EODC) specialises in the field of Earth Observation. We operate and maintain multiple public and private cloud computing infrastructures, handle petabyte scale storage systems, and provide our storage to some of Austria's most powerful computers, including the VSC-5 (Vienna Scientific Cluster).

To strengthen its IT Services and Operations team, the EODC is looking for a

Cloud Platform Engineer

(f/m/d)

Full-Time

Unlimited Contract

Vienna, Austria

What you'll be doing

- Working to build cloud infrastructure, as well as deploy on it.
- Building up infrastructure components to provide new services and enhance existing ones for internal and external users.
- Managing and evolving our petabyte scale storage solutions.
- Developing and maintaining our public / private cloud environment (based on OpenStack).
- Helping shape the long-term direction of our IT services.
- Being a part of a team committed to knowledge sharing and continual learning.
- Following ITSM standards for configuration and change management, incident handling, etc.

What you offer

- Minimum of three years' work experience in a comparable role.
- In-depth understanding of Containers (Docker), Orchestrators (Kubernetes), and Helm Charts.
- Strong understanding of distributed storage; especially Ceph/Rook or GPFS.
- Familiarity with monitoring and metrics.
- Experience with automation and infrastructure-as-code.
- Good scripting skills, particularly in one or more of the following: Bash, Python, or Go.
- Enthusiasm for version control, GitOps principles.
- Willingness to explore and learn new innovative solutions.
- Bonus points for hands-on experience with virtualisation, HPC, or software defined networking.

What we value

- Ability to work well as part of a team.
- Eagerness to understand how and why things work.
- An ability to explain concepts at varying levels of technical understanding.
- Linux, open source-software, command-line interfaces, reproducibility.
- Fresh ideas, insights, and solution-oriented response to challenges.
- Independent, responsible, and flexible work organisation.
- Excellent organisational skills, with a structured and goal-oriented approach in task management.

What we offer

- You will have the opportunity to work with cutting-edge technologies and learn continuously in a dynamic team.
- An understanding of work-life balance and an environment free of “all-in” contracts.
- Flexitime working model with home office possibilities.
- Generous opportunities for professional development across a range of subjects.
- A modern office with easy public transportation access, bicycle friendly, ample parking options, on-site cafeteria, and green surroundings.
- Eligibility for various discount schemes.
- A permanent role in an established, international, and enthusiastic company.
- Based upon the collective agreement “Dienstleistungen in der automatischen Datenverarbeitung und Informationstechnik” 2023 (KV Gruppe “ST1”, “Regelstufe”) the minimum monthly gross salary for this position is at EUR 3,455 (38.5 hours a week). The actual payment will depend on your qualification and experience.
